Description

Polypropylene is a non-toxic, odorless, and tasteless milky white high crystalline polymer with a melting point of 164-170°C, A density of 0.90-0.91g/cm³, and a molecular weight of about 80,000-150,000. It is one of the lightest of all plastic varieties at present. It is particularly stable to water, and its water absorption rate in water for 24 hours is only 0.01%.

Application direction

It is mainly used in the field of non-woven fabrics and other production fields, and its products are used in the fields of decoration, medical and health materials.

Product packaging

Packed in 25 kg or 700 kg bag.
